1	<b>Replacement/upgrade to the CCTV system</b> IP CCTV Solution: We will provide the following; Replace the current analog CCTV system with a IP solution ( OnSSI Ocularis ) This would include: New cat5E cable to each camera back to the IDF or electronic conversion of the cables that cannot be repulled with demo of parts of the building PoE switches to allow power for the cameras and a separate network that can be routed into the city network. This will keep majority of the bandwidth off of the city network. 7 new IP cameras – 4 indoor models and 3 outdoor models (adjusting model selection based upon location and lighting conditions, P1405-LE, M3045, P3707-PE) We are also utilizing a High Quality 360degree camera that will allow us to cover a more than what the current PTZ can and will not require an operator. Demo of the old cameras and DVR Demo of the hanging monitor Some conduit work to relocate one of the existing cameras so that it can cover around the corner Custom mount for the 360degree camera to replace the PTZ on the roof Server with enough storage for a minimum 30 days of archived footage. Replace the current analog CCTV monitor and bracket with a flat panel HD monitor. This would include: New cabling back to the client station New bracket § New monitor We would run the feed from the client station as a second monitor Install a UPS that will allow 15 min minimum power outage to support the main CCTV server and PoE switch. This will allow for all cameras to stay powered on and continue recording.  Insurance and business tax to be updated as required.  Billing Contact: Rosita Ravelo, (619) 238-6644, rravelo@sandiego.gov Item completely delivered	03/29/2017	25,000 EA	USD 1.00	USD 25,000.00
