FIELD BOOK

No. 385 F

MICROFILMED

Our Leather Bound Engineers Note Books are carried in the following rulings:

- No. 380 LEVEL BOOK. Left and Right Hand Page the same as Left Hand Page of this Book.
- No. 382 FIELD BOOK. Left Hand Page as in this Book, Right Hand Page 4 x 4 to the inch, Center Line Red.
- No. 384 MINING TRANSIT BOOK. Left Hand Page as in this Book, Right Hand Page 8x8 to the inch, Center Line Red.
- No. 385 FIELD BOOK. Left Hand Page as in this Book, Right Hand Page 8 vertical and 4 horizontal lines to the inch, Center Line Red.

We also carry the Note Books listed above, bound in extra strong Fabri-Hide (otherwise the same quality of book), which can be furnished at a somewhat lower price.

In ordering Fabri-Hide covered books, add the letter "F" to catalog number.

## DIRECTIONS FOR USE OF TABLES

TABLE No. 1.

Distance of slope stake from side or shoulder  
stake for any width roadway, slope  $1\frac{1}{2}$  to 1.  
If ground is nearly level, the cut or fill at side  
stake is located by the double entry method in  
left column and top row. The number in body  
of table is same as in column given distance  
from side stake to slope stake. If ground is not  
level, the amount it can elevate it fill. Add this amount  
to cut or fill and find in table. Set up  
rod at this point and line of sight through cut  
larger  
necessar

## IMPROVED TABLES AND INFORMATION

TABLE No. 2.

To find Tangent and External for curve of  
any other degree, divide by degree of curve and  
add connection found in column of connections.  
Degree of curve with a given  $T$  may be found  
by dividing tangent (or external) opposite  $T$  by  
given tangent (or external).

The distance from a point on the tangent to  
the curve is very nearly the square of the tangent  
length divided by twice the radius.
